

BIZZOZERO MICA SRL

BIZZOZERO, 70th BIRTHDAY NEXT 2009, EXHIBITS NEW AND TRADITIONAL MACHINES TO CONVERT CORRUGATED CARTON:BIG IMPROVEMENT FOR BOXMASTER 2750.

BIZZOZERO factory, which has been working since 1939, making wire stitchers, will be seventy years old in 2009 at the next CONVERFLEX exhibition.

His machines works long time thanks to their hardiness and to the ability of Bizzozero to give them assistance and spare parts, also with old dated machines.

Bizzozero has been always abreast of technician progress centring his plans and products on a nich of the international market, where greater is the demand of new technologies and high are the claims of the customers: Stitchers and special Printer Slotter as the BOXMASTER and CLEVER SLOTTER for any type and size of corrugated carton. At CONVERFLEX shall be shown the last models of the above machines.

The transversal BOXMASTER 2750 to work and print corrugated carton shall continue his success becoming BOXMASTER 2750 CLEVER. His productiveness increases of 15 % and the die cutting area increases 10 times. It is possible to make and to repeat the die cuttings in according with the memorized program in any position of the corrugated carton sheet of any thickness or weight. The more than 100 FEFCO codes that are worked by the old model are largely increased by BOXMASTER 2750 CLEVER without the loses of time.

The wire stitching, that is the core business of BIZZOZERO by the production of 12 types of stitching heads and 4 types of Semiautomatic Stitchers at one or two heads, shall have at CONVERFLEX two novelties: the automatic squaring stitching unit that can work in line with any type and size of casemaker and a new harm stitcher till 2450 mm with a large table that let to stitch any type of big boxes at low cost.
