

BOETTCHER ITALIANA SPA

BLANKETS, FOUNTAIN SOLUTION, WASHING AGENTS, MAINTENAINCE PASTES FOR OFFSET PRINTING INDUSTRY, ROLLS AND SLEEVES FOR ANY PRINTING PROCESS.

Alcohol reduction and alcohol free printing, high speed presses, energy saving, all this factors are connected to the use of our products.

Boettcher is in the Graphic Arts since long time. Boettcher always succeed in giving the right solution to his customers. The continuous technological innovations in printing presses can exists thanks to the improvements made by our R. & D. department too.

Our endless cooperation with all press machine manufacturers make us unique for all the end-users. Boettcher developed the best rubber both for ink and dampening rolls, in particular we follow the object of alcohol reduction and alcohol free printing. We reach this purpose thanks to the new type of roll "PRO ACQUALIS".

This type of roll is recovered with an innovative rubber for continuous dampening systems.

The best results are obtainable using our products: rubber rolls, fountain additives, blankets and washing agents, expressly developed for this aim.

Sheet-feed offset print, web cold / heatset print, flexo, rotogravure, UV print, carton print, each of our product has been developed for each of this application field.
