

CARTES SRL

Cartes is glad to renew its presence at CONVERFLEX 2009 with the most innovative equipment for the Graphic industry.

On our booth you can find the Laser 350 Compact in action. This machine has an integrated unwinder and rewinder and it can cut, die-cut, kiss-cut, engrave and micro-perforate any label shape and many kinds of materials reaching a production speed up to 60 meters per minute. You will also be able to see an In-Line version of this machine with a DOUBLE LASER SOURCE, that accelerates the production output reaching incredible speeds.

These self adhesive label converting machine with LASER technology are a growing success installed in 28 different Countries they are the most esteemed among the label printers. Thanks to their easy computer operability they offer the highest performances in terms of speed, flexibility and quality. They are entirely tool free and low-cost in maintenance.

Cartes also manufactures a wide range of printing machinery with various web width that satisfy many printers production needs, these machines can be combined with: Silk Screen printing, Hot Stamping, Flat Die Cutting and Laser converting.

Other than the laser equipments you will also find on our booth some configurations of the above printing machines, slitting and rewinding machine model TN 1200 for flexible materials, lathe-system slitting machine model T 130 for logged self adhesive materials, electronic sheeter model TFE 350 and Flexo varnishing machine suitable for primer application on digital printed material, with IR and UV drier and rewinder integrated model VF 350.
