

FUSTELLE SNC di NEGRINI F. & C.

THE SMALL COMPANY, THE BIG REALTY

The company has been focusing its activity on constant technological development and on the research for innovation. The company, which has been on the market for over half a century, is able to supply products that can fully meet the demands of the market in the die cutting sector.

The focus is on quality and on the reduction of starting time and on a constantly increasing standard of service. The company manufactures either wood or plastic based cutting dies for paper industry with the aid of CAD station fully automated laser techniques for the cutting and folding of blades. In particular, this system can achieve, above average levels of precision, quality and speed of execution, with regard to dies for self-adhesive labels. The company traditionally produces steel die, which are obtained from a single block of material by means of electrical discharge machining or optical control cutting.

Dies mounted on to a metal base are the company new product and they are suitable for hot cutting. The company is now involved in rotative cutting, with flexible die, cylinder, magnetic plate and gravure cylinder. The development of this technology has paved the way for the production of a kit used for the application of flexible sheets for die cutting directly onto the machine.
